2 ABOUT UESB

Established on the 30th of December, 1980, Southwest Bahia State University (UESB) has been a reference in higher education in the interior regions of Bahia and northern Minas Gerais for the past four decades. Celebrating its 45th anniversary in 2025, UESB is recognized as a reference institution in undergraduate and graduate courses, as well as in the field of research, extension and scientific production of knowledge. The University's commitment to quality education is reflected in its broad diversity of courses and in its impact on regional, national and, in some areas, international development.

UESB offers more than three thousand admissions in undergraduate courses annually through 47 (forty-seven) courses, located on the campuses of Itapetinga, Jequié and Vitória da Conquista.

Every semester, UESB graduates hundreds of professionals and researchers, focused on different areas of knowledge. The undergraduate courses (<http://catalogo.uesb.br/>) cover several areas of concentration, including Humanities and Arts, Applied Social Sciences, Exact and Technological Sciences, Biological and Health Sciences, Agricultural Sciences, Engineering, etc.

UESB also invests heavily in Postgraduate Programs (http://www2.uesb.br/proreitorias/ppg/?page_id=214). The institution offers 25 (twenty-five) master's programs and 14 (fourteen) doctoral programs, in addition to a variety of specializations (Postgraduate Certificate Programs).

There is also a commitment to innovation, technology and research, implementing policies to support new ideas and encourage international academic mobility. The university's outreach projects have reached more than one million people in recent years, emphasizing its role in community engagement and education.

To support the academic life of the student community, UESB has expanded its infrastructure with over 200 (two hundred) laboratories in different areas of knowledge.

The high quality of the teaching and technical-administrative staff, as well

as other UESB employees, is a fundamental point that contributes to its high national rankings. The University consistently maintains level 4 of the General Course Index (IGC), reflecting the excellence of its educational programs.

UESB seeks to advance knowledge through teaching, research and outreach , with the aim of contributing to regional, national and international development. The university seeks to acquire a leadership role as a global institution, engaged in international collaborations and challenges through innovative solutions in the field of technology and science of excellence.

The institution actively seeks to develop actions in the field of internationalization. Several postgraduate programs have received excellence ratings from CAPES (Coordination for the Improvement of Higher Education Personnel), demonstrating their significant contribution to national and international development. These programs highlight the academic commitment to excellence, attracting high-quality faculty and promoting internationalization.

Data from the year 2025 from the International Office (ARInt) proves the existence of more than 30 (thirty) International Agreements, involving countries from different continents, constantly expanded through a process of negotiating new cooperation.
