#### Abstract:

Do consumo social ao problemático, o álcool é a droga mais utilizada no mundo. O alcoolismo, consequência do uso abusivo e incontrolável do álcool, tem se tornado uma das maiores preocupações no campo da saúde pública. Este estudo tem como objetivo compreender o sentido dos profissionais do Centro de Atenção Psicossocial Álcool e Outras Drogas em relação ao cuidado de alcoolistas. Trata-se de uma pesquisa qualitativa, fundamentada no referencial metodológico da História Oral de Vida. Os resultados evidenciaram que os profissionais entrevistados produzem sentidos acerca do alcoolismo limitados a uma condição patológica e como uma calamidade. A pesquisa demonstra a importância dos sentidos dos profissionais do Centro de Atenção Psicossocial Álcool e Outras Drogas para a compreensão sobre o cuidado de alcoolistas. As narrativas de história de vida desses profissionais foram intrigantes, ao mesmo tempo que instigam intensas discussões. Por se tratar de um problema de saúde pública e ser um assunto polêmico e digno de várias reflexões, o estudo abre possibilidades para intervenções e novas pesquisas.
